Sarah, another thing. Julie Wroble thinks we should get data on whether lead chromate is in the emissions.

Subject: Data for Bullseye Glass
Importance: High

Hi, Sarah. Sorry I missed you on Friday. I left at 6. Just to follow up on your call with Katie on Friday, here are some things we would like to get if possible. Thanks!

- We would like to get all the rest of the sampling data besides the Fred Meyer parking lot, including the North Rose Lawn 2015 data.
- Could you check with the lab to see if there are enough samples left to do further testing on, for chromium speciation?
- Have there been any wind rose charts developed yet for the Bullseye site?
- The new map indicates some high cadmium concentrations around Harriet Tubman. Since that school isn't being shut down as originally thought, do we need some more follow up there? The additional monitoring back in 2008/9, didn't have any concentrations exceeding Oregon's benchmarks.
- I have an email to Greg Grunow, asking if he has any flow diagrams for the Bullseye Glass facility.
